

TOPIC: True Access: Truly Accessible Wood Ceilings

Wood ceilings are beautiful, but they're not typically accessible. Accessibility has remained a frustrating barrier, figuratively and literally, for architects and their owner clients. In this presentation, 9Wood will highlight True Access, a new wood ceiling product that is fully accessible without compromise. The presentation will cover installation, ease of use, and overall functionality of the new True Access options – including immersive video demonstrations for Grille, Linear and Tile configurations. Join us to learn about True Access – the most accessible wood ceiling on the market.
