

TOPIC: Metal Ceilings: A unique innovation combining proven stone wool performance and attractive metal surfaces

Rockfon Metal combines the unique stone wool performance characteristics such as A1 safest reaction to fire and highest Class A sound absorption with an attractive and modern metal surface. Rockfon Metal offers market leading Class A sound absorption, achieving the highest alpha rating of 1.00. The ceiling's high absorption controls the ambient sound level, preventing echo and increasing speech intelligibility. This exemplary performance makes it ideal for offices, public buildings and retail outlets. Our range of metal ceilings further strengthens our position as a leading acoustic ceiling manufacturer. Please join us to learn more about our Metal acoustic solutions for your interior/exterior needs that will inspire and make specifying simpler and easier.
